

Jie Hu 胡捷

Male | 24 years old | Native place: Shanghai ☎ 13611760938 ✉ 122089111@qq.com
Game Development | City: Shanghai

Professional Summary

1. Proficient in 3D modeling software such as 3DMAX, Maya, and Blender, possessing professional skills in the entire process from model creation, UV unfolding, texture drawing to physical substrate rendering (PBR). In the field of game design, I am particularly skilled in stylized and next-generation game scene and level design, passionate about game art, and committed to creating high-quality game visual experiences.
2. With technical art (TA) internship experience, proficient in programming languages such as C#, C++, as well as GLSL and HLSL shader languages, deeply involved in the development of Unity engine and Unreal Engine 4/5 projects. Capable of writing Shader and DCC tool scripts and programmatic modeling, with a deep understanding and practical experience in rendering pipelines, providing solid technical support for game development.
3. In terms of visual communication, proficient in professional software such as Photoshop, Illustrator, After Effects, Premiere Pro, and DaVinci Resolve, with a strong foundation in color matching, composition design, and rhythm control of works, able to create works with strong visual impact. Has won multiple national awards in the National Digital Art Competition and the China Good Creative Design Competition.
4. Through internship experience in the design field and top gaming companies, not only have I accumulated rich practical experience, but I have also developed excellent teamwork spirit and communication skills. I have experience as a game development PM and can efficiently collaborate in a diverse team environment to jointly promote the smooth progress of projects.
5. In terms of academic research, I am passionate about computer graphics, AIGC, and game design, and have published one EI paper, one SCD paper, and one SCI Zone 3 paper in related fields.

Internship

腾讯 天美工作室 Tencent Game development management 2025.03-Now

1. Responsible for the full process management of the UE5 PC open world engine development project, developing project plans, tracking progress, coordinating resources, and ensuring timely and high-quality delivery of the project.
2. Responsible for the client quality and related work of the new gameplay of Yuanmeng Star Open World.
3. Responsible for the art development of UE5's ongoing action games.
4. Responsible for researching cutting-edge AIGC integrated gaming projects, including PCG modeling, generative textures, spatial intelligence, etc.
5. Communicate closely with planning, programming, art, and other teams to clarify requirements, develop technical solutions, and drive project progress.

莉莉丝游戏 Lilith Games Game release project management 2024.10-2025.03

1. Responsible for coordinating and assisting the marketing and distribution strategies of all game products in China, ensuring a unified and efficient brand image.
2. Responsible for managing the planning and production of game promotional materials, including but not limited to videos, graphic design, etc., to meet the needs of different channels and platforms.

3. Work closely with the project team to ensure high consistency between promotional materials and game content, and enhance user experience.
4. Monitor and optimize the distribution process, adjust market promotion strategies in a timely manner through data analysis, and enhance market competitiveness.
5. Coordinate cross departmental resources, efficiently promote the execution of publicity projects, and ensure the timely completion of high-quality promotional material production.
6. Regularly evaluate the effectiveness of promotion, collect market feedback, and provide decision support for product optimization and subsequent promotion.
7. Manage and train the publicity team, enhance the team's professional skills and collaboration efficiency, and build an efficient working atmosphere.
8. Explore and innovate promotional channels and methods, expand brand influence, enhance user stickiness and market share.

分众游戏 Fen Zhong Games Technical Art 2023.05-2023.08

1. Work closely with art designers and program developers to design and implement rendering solutions, accurately achieve visual effects in art, and effectively solve the needs and technical difficulties encountered in various stages of art development.
2. Establish and continuously optimize the workflow and standardized development of art resources, providing strong technical support for the team; Design and implement management standards for art resources to ensure strict implementation of engine standards and improve overall team work efficiency.
3. Conduct in-depth optimization of the scene rendering scheme, improve the overall performance of the software through technical means, and ensure the smooth operation of the game or application.
4. Work closely with the art team and engine programmers to address various issues that may arise during the daily use of the tool engine, ensuring a smooth development process.
5. Actively participate in the development of the Unity project, focusing on optimizing rendering pipelines, terrain editing, adjusting lighting effects, and contributing professional expertise to the success of the project.

Infosys Illustrator 2021.06-2021.09

1. Responsible for participating in and creating original picture book illustrations;
2. Responsible for taking over wire drawing, coloring, and post production;
3. Produce complete original picture book designs and derivative products such as IPs; Cultural and Creative Design

Education

Shanghai University of Engineering and Technology Master
Digital Media (Game Design)

2023-2026

1. Received the Graduate Academic Scholarship in 2023 and the Graduate Academic Scholarship in 2024
2. Major courses: Game Engine Research, Game Scene Design, Game Graphics Technology Research, Advanced Animation and Image Design Research, VR Game Research, etc
3. Won several national and provincial first prizes in a design competitionGPA: Top 10% of professionals
4. My research direction is computer graphics, AIGC combined with game design, and I have also published one EI paper, one SCD paper, and one SCI Zone 3 paper as the first author during my school years (under revision)

1. Received the 2020-2021 Shanghai Jianqiao University Scholarship and the 2021-2022 Shanghai Jianqiao University Scholarship.
 2. Major courses: 3D Animation and Design, Computer 3D Animation Production, Computer Image Design, Game Illustration, Business Illustration.
 3. Graduation project awarded as excellent in Shanghai
- GPA: Top 10% of professionals

Project List

《元梦之星开放大世界》Yuanmeng Star Open World R&D project management 2025.03-Now

1. An immersive open world survival exploration game based on the "Yuanmeng Star" IP, integrating core gameplay such as interstellar exploration, pet capture, resource collection, and social collaboration, to build a seamless metaverse ecosystem with multiple scenes.
2. Quality inspection and process control: Develop client module testing standards: Design test cases for core gameplay such as loading in big world scenarios, synchronizing pet battles, and resource collection and interaction; Establish a defect attribution library: classify and analyze bugs by module (rendering/physics/AI), generate visual reports to drive priority repairs.
3. Technical difficulties tackling: Performance optimization: Leading the big world streaming loading solution, balancing memory usage and scene loading speed; Art bug handling: Coordinate art and TA teams to solve problems such as abnormal rendering of special effects materials and terrain material penetration;
4. Collaboration and risk management; Organize weekly progress synchronization meetings for different modules of the client (engine, combat, build, PVP, etc.) to align related research and development matters.

《剑与远征：启程》AFK: J Art project management 2024.10-2024.12

Content:

1. Participated in the production and management of art assets for the Chinese distribution of "Sword and Expedition: Departure", which was nominated for TGA's Best Mobile Game of the Year.

Achievement:

As a PM, I participated in the promotion decision-making and script planning for the release of the game in China, followed up on the progress of the video and graphic materials for promotion, and effectively communicated with the production team's teachers and UA. Follow up and produce 500+sets of video materials and 100+sets of flat banner materials.

“数禾” 数字孪生项目开发 Development of the "Shuhe" digital twin project Technical Art 2023.05-2023.08

Content:

The "Shuhe" digital twin project is an advanced visualization solution tailored specifically for Shuhe Company's lending business, built on Unity, a leading real-time 3D engine. The project aims to transform complex loan data processes into intuitive, dynamic, and easily understandable digital twin models through stylized rendering techniques. Users can use dedicated mobile applications (APPS) to query, monitor, and optimize various aspects of lending business in real-time anytime, anywhere, achieving transparent and intelligent management of business processes.

Achievement:

Directly involved in the production of U3D projects, serving as a technical artist, responsible for integrating and modifying art resources, editing maps, writing shaders, improving rendering effects, optimizing rendering

processes and art resources, handing over to the programming department, acting as a technical consultant, solving and modifying technical problems and new requirements of the client.
